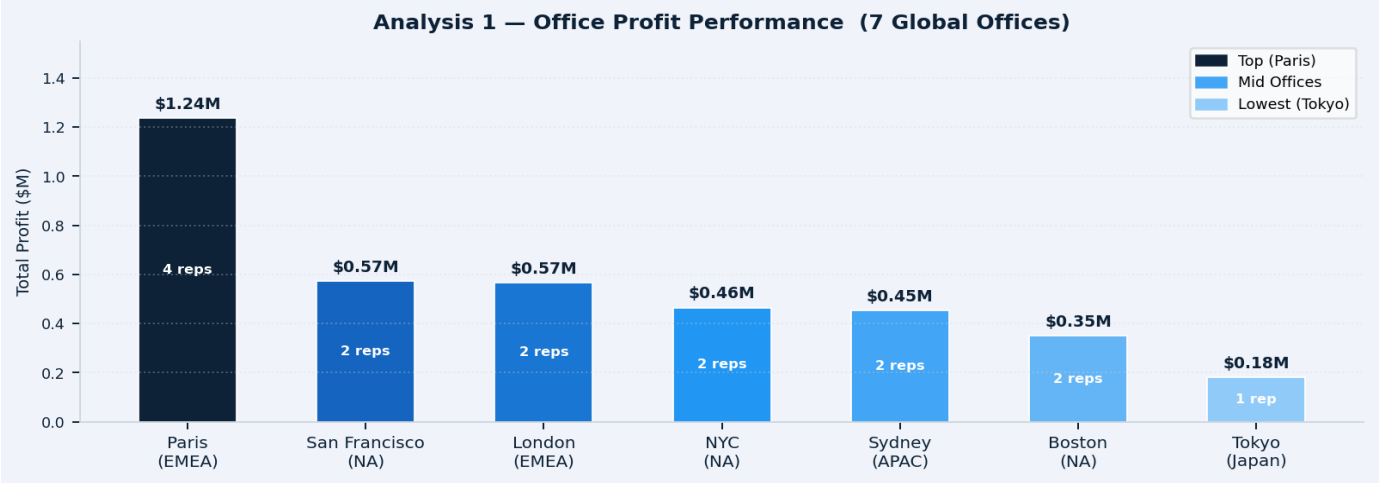
stores.db · SQLite

Total DB Profit	Total Orders	Avg. Ship Time	Churn-Risk Customers	Top Office
$3.83M	**326**	**3.8 days**	**15+**	**Paris**

■ Analysis 1 — Sales Rep & Office Performance

Paris leads with $1.24M profit from 4 reps — more than double any other office. Tokyo significantly underperforms at $181K with 1 rep.

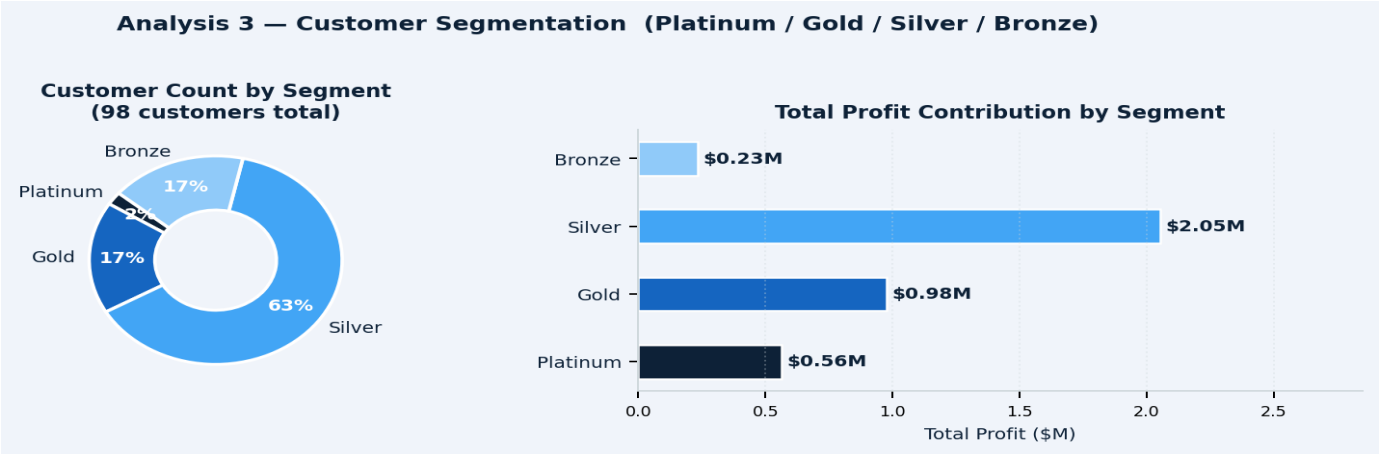


Top 10 Sales Representatives by Total Profit

Sales Rep	Office	Customers	Orders	Total Profit
Gerard Hernandez	Paris	7	43	**$504,644**
Leslie Jennings	San Francisco	6	34	$435,208
Pamela Castillo	Paris	10	31	$340,727
Larry Bott	London	8	22	$290,203
Barry Jones	London	9	25	$276,659
George Vanauf	NYC	8	22	$269,596
Loui Bondur	Paris	6	20	$234,891
Peter Marsh	Sydney	5	19	$230,811
Andy Fixter	Sydney	5	19	$222,207
Steve Patterson	Boston	6	18	$197,879

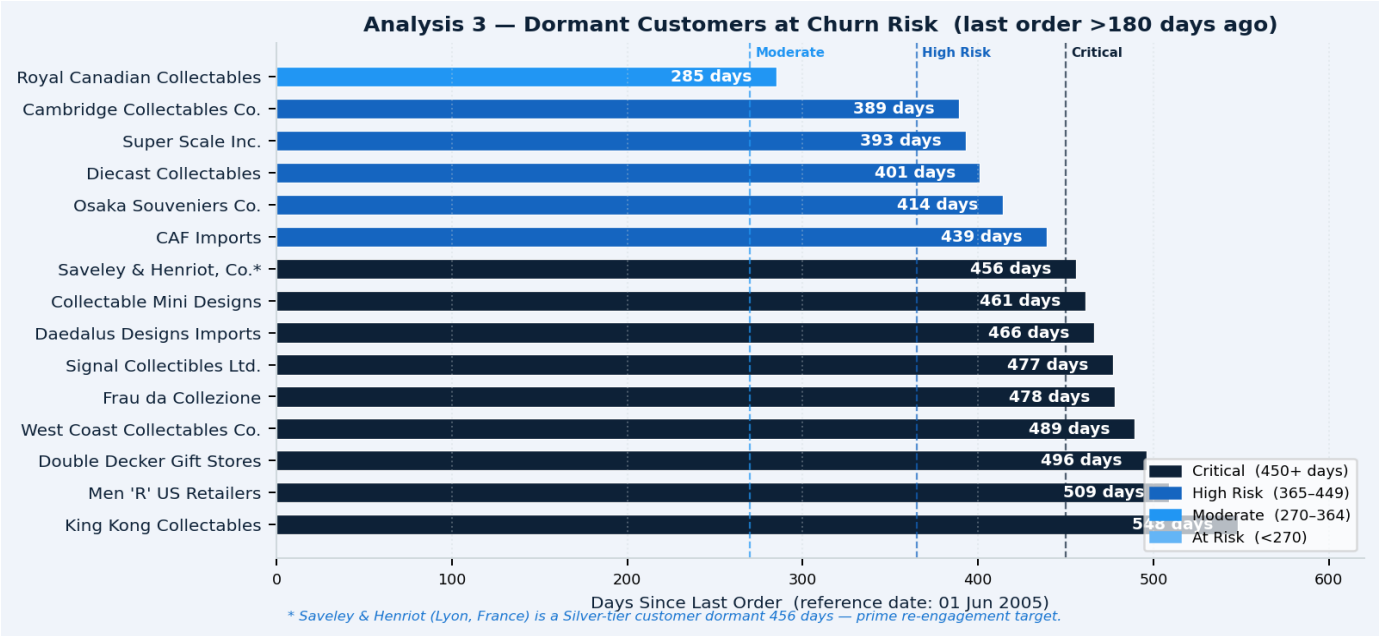
■ Analysis 3 — Customer Segmentation

2 Platinum customers generate $563K. Silver tier drives the highest total ($2.05M) through volume (62 customers). 15+ dormant customers are at churn risk.



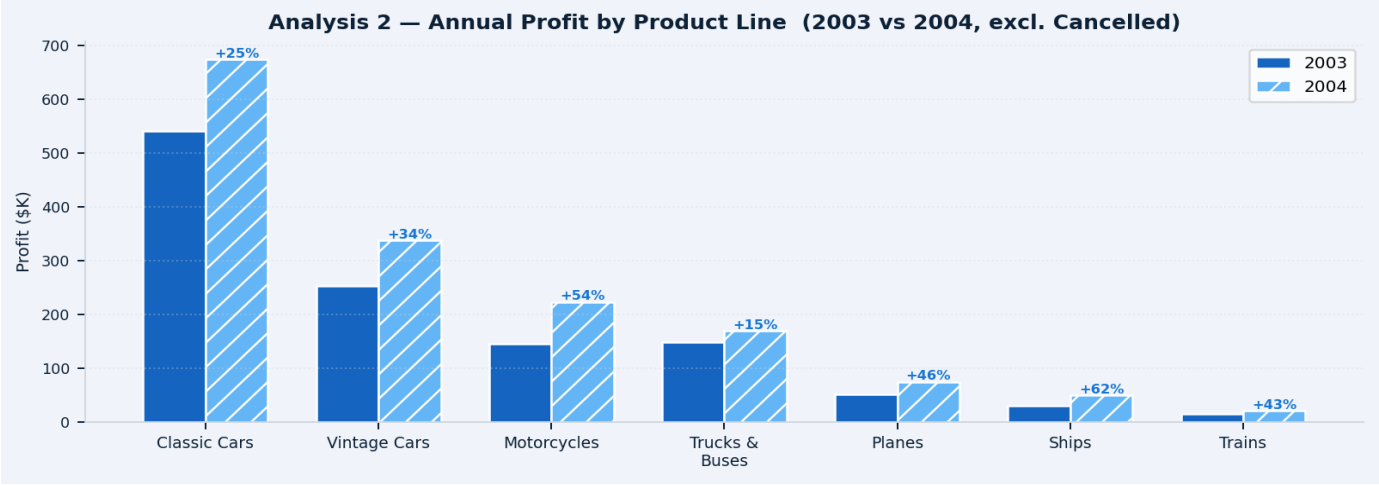
■ Analysis 3b — Dormant Customer Churn Risk

15 customers have not placed an order in over 180 days. 8 are in the critical band (450+ days). Saveley & Henriot (Silver tier, 456 days dormant) is a high-priority re-engagement target.



■ Analysis 2 — Revenue Trends by Product Line

Classic Cars account for ~40% of total profit every year. November is peak month (~8x January). All product lines grew from 2003 to 2004.



■ Database Schema — Entity Relationship Diagram

stores.db: 8 tables, ~4,100 rows. Phase 2 uses up to 5-table JOINs, date functions (strftime/julianday), CASE WHEN segmentation, and a self-join on employees.
